Subject: Metals analysis on imported fill for Wichita
Date: Tuesday, May 06, 2014 2:55:39 PM

Hello Chris,

I have a follow up question to your comment #10 on the IRM workplan. Did you have a specific metals list in mind with regards to metals analysis of imported soil? We plan to run a full list of 8260 and 8270 compounds, but as you know, the options for metals are quite exhaustive and we are trying to get some samples from the quarry run within the next couple of days. Do you have any thoughts on what you are looking for specifically?

I also wanted to see if you could send us an email regarding the Building J, North of Building J, and West of Building I work approval. I believe we have all of the other City requested information together for our permit and are eager to get the ball rolling with the City.

Thanks,

Mike Stephenson
